Only valid for: Enhancement Package Installation;Installation;Upgrade |

# 1 Getting Started

Only valid for: Enhancement Package Installation;Upgrade |

This section of the guide contains important information that you need to read before starting your update or upgrade process.

End of: Enhancement Package Installation;Upgrade |

Only valid for: Enhancement Package Installation;Installation;Upgrade |

## 1.1 Essential Information: Process and Documentation Overview

Only valid for: Enhancement Package Installation;Upgrade |

This guide contains information specific to SAP ERP only, but you need additional information to perform your upgrade correctly.

End of: Enhancement Package Installation;Upgrade |

Only valid for: Enhancement Package Installation;Upgrade |

### Software Update Manager

In addition to the application-specific guide, you use the Software Update Manager (SUM) for the upgrade or update.

The following table contains definitions of these terms:

Table 2

Term	Definition
<i>Update</i>	Installation of an enhancement package in an existing SAP system.
<i>Upgrade</i>	Upgrade to an SAP system including an enhancement package.

The Software Update Manager (SUM) guide contains information on the overall process, tools, the operating system and the database, while this guide contains the application-specific information.

For the SUM guides, see SAP Help Portal at ► [help.sap.com/slttoolset](https://help.sap.com/slttoolset) ► *System Maintenance* ► *Software Update Manager (SUM)* ►

End of: Enhancement Package Installation;Upgrade |

### Master Guide

- Make sure that you also read the Master Guide for SAP Enhancement Package 8 for SAP ERP 6.0. The Master Guide provides you with the overall view of the implementation process, meaning installation, upgrade or update processes, and with references to important information during implementation.
- Make sure that you collect all the information about planning and implementation processes that is contained in the Master Guide before starting your installation, upgrade, or update project.

- Make sure that you have downloaded the latest version of the *Master Guide SAP Enhancement Package 8 for SAP ERP 6.0* from SAP Service Marketplace at ► [service.sap.com/erp-ehp8-inst](https://service.sap.com/erp-ehp8-inst) ► ↗.

## More Information

You can access documentation for all maintained product releases on SAP Help Portal at ► [help.sap.com/erp](https://help.sap.com/erp) ► ↗.

### Target Release Documentation

The documentation for the target release is not available online in your system until you have completed the upgrade and the installation procedure for the online documentation.

Before the upgrade, ensure that you can read the DVD offline. After the upgrade, you need to install the documentation for the target release.

For SAP Library for SAP ERP 6.0 including SAP enhancement package 8, see SAP Help Portal at ► [help.sap.com/erp](https://help.sap.com/erp) ► ↗.

### SAP Fiori Apps

For more information regarding SAP Fiori apps, see *SAP Fiori for SAP ERP* in the documentation of SAP ERP on SAP Help Portal at ► [help.sap.com/erp](https://help.sap.com/erp) ► ↗.

[End of: Enhancement Package Installation;Installation;Upgrade |

## 1.2 Important SAP Notes

[Only valid for: Enhancement Package Installation;Upgrade |

Table 3

Note Number	Title	Comment
<a href="#">1816819</a> ► ↗	<i>Dual Stack Support for Business Suite systems</i>	Contains information about a dual-stack split required for the upgrade to SAP Business Suite 7i2016 or SAP NetWeaver 7.5.
<a href="#">2171334</a> ► ↗	<i>Release Information Note SAP EHP8 for SAP ERP 6.0</i>	Contains a list of all SAP ERP 6.0 Release and Information Notes (RIN) that have been issued for SAP enhancement package 8 for SAP ERP 6.0.
<a href="#">998833</a> ► ↗	<i>Release Restrictions SAP ERP 6.0 - Enhancement Packages</i>	Provides information about the limitations for SAP enhancement packages for SAP ERP 6.0:

Note Number	Title	Comment
2258099 	<i>Enhancement package 8 for SAP ERP 6.0: Required SWC</i>	Describes the software components of your SAP system that you need to update in order to use enhancement package 8 functionality.
2167814 	<i>SAP Enhancement Package 8 for SAP ERP 6.0: Compatible Add-ons</i>	Informs you about the points you have to consider when you plan to run SAP enhancement package 8 for SAP ERP 6.0 together with an add-on in the same system.
156387 	Composite Note on Upgrade Problems for the SAP Component HR (Human Resource)	This is an HR-specific SAP Note.
774615 	<i>Support Package Levels for SAP ERP / SAP ECC Installations and Upgrades</i>	Contains information about the ABAP Support Package levels and kernel patch levels contained in the installations and release upgrades (including Support Releases) listed in the SAP Note.
1000009 	<i>ASU Toolbox</i>	Contains information about the ASU Toolbox. The ASU Toolbox enables the customer to recognize the steps that are required before and after the update in addition to the actual technical update. Furthermore, the ASU Toolbox performs these steps in the system in a controlled manner.
1600482 	<i>Hierarchical access functionality</i>	Upgrade SAP Note describing an incompatible change.
835625 	<i>XSS Backend UI Conversion Classes</i>	Describes the changes made in UI conversion classes in SAP ERP 6.0.
1943931 	<i>Installation/Upgrade for the ABAP Add-On BI_CONT / BI_CONT_XT 757</i>	Contains upgrade information for Business Intelligence Content.
1985663 	<i>BI_CONT / BI_CONT_XT 757: Information on Add-On Support Packages</i>	Information on Add-on Support Packages for BI_CONT and BI_CONT_XT 757.
1262124 	<i>Vendor Key Handling in ERP Enhancement Packages</i>	Contains information about vendor keys to keep existing add-on versions.
1605816 	<i>FI: Posting/Clearing – Upgrade to EHP6 for Modified Programs</i>	Relevant for customers who have modified programs prior to SAP enhancement package 6 for SAP ERP 6.0 (SAP_APPL 606).

Note Number	Title	Comment
<a href="#">1563579</a> 	<i>Central Release Note for Software Logistics Toolset 1.0</i>	Contains a link to the note of the latest SL Toolset SPS Note, which contains all information about the available tools with their correct versioning/SP level.
<a href="#">1514967</a> 	<i>SAP HANA: Central Note</i>	Central SAP Note for SAP In-Memory Appliance (SAP HANA).
<a href="#">1514966</a> 	<i>SAP HANA 1.0: Sizing SAP In-Memory Database</i>	Contains information about sizing for the SAP In-Memory Database (SAP HANA).
<a href="#">1793345</a> 	<i>Sizing for Suite on HANA</i>	Contains suite-specific sizing information for the SAP In-Memory Database (SAP HANA).
<a href="#">1681092</a> 	<i>Multiple SAP HANA databases on one appliance</i>	Contains support information and special considerations for multiple SAP HANA databases on a single SAP HANA appliance.
<a href="#">1826100</a> 	<i>Multiple applications SAP Business Suite powered by SAP HANA</i>	Contains support information and special considerations for multiple applications on a single SAP HANA system within SAP Business Suite.
<a href="#">1655335</a> 	<i>Use Cases for Splitting Dual-Stack Systems</i>	Contains information about splitting SAP dual-stack systems.
<a href="#">1785057</a> 	<i>Recommendations for migrating suite systems to SAP HANA</i>	Contains recommendations for migrating suite systems to SAP HANA.
<a href="#">1794297</a> 	<i>Secondary Indexes for the business suite on HANA</i>	Contains information about when using secondary indexes is beneficial.
<a href="#">1798895</a> 	<i>Additional information for manual ABAP-on-HANA correction process</i>	Contains additional information for manual ABAP-on-HANA corrections.
<a href="#">1881281</a> 	<i>Business Suite on SAP HANA content activation problems</i>	Contains information on solutions for SAP HANA content activation problems that occur during the installation or update of Business Suite on SAP HANA releases.
<a href="#">2048896</a> 	<i>Hana Content activation check</i>	Contains information about checks to ensure that SAP HANA content is activated correctly.
<a href="#">1875197</a> 	<i>Using DMO of SUM for SAP Business Suite systems</i>	Describes the procedure to follow in order to make use of the capabilities of Software Update Manager to combine the update and migration to SAP HANA.

End of: Enhancement Package Installation;Upgrade |

## 1.3 Naming Conventions

Only valid for: Enhancement Package Installation;Installation;Upgrade |

### SAP ECC System and SAP System

In this document, the term “SAP system” means the same as “SAP ECC system”. “SAP” is also used as a synonym for “SAP ECC” in terms such as “SAP start profile” or “SAP system language”.

End of: Enhancement Package Installation;Installation;Upgrade |

Only valid for: Enhancement Package Installation;Installation;Upgrade |

### SAP System ID

In this document, the SAP system ID is abbreviated as “SAPSID” or “sapsid”. If “<sapsid>” is used, your SAP system ID must be in lowercase, for example “prd”. If “<SAPSID>” is used, it must be in uppercase, for example “PRD”.

End of: Enhancement Package Installation;Installation;Upgrade |

Only valid for: Enhancement Package Installation;Installation;Upgrade |

### SAP R/3 Enterprise and SAP ERP Central Component

SAP ERP Central Component is the successor of SAP R/3 Enterprise. It consists of the SAP ERP Central Component Core with SAP ERP Central Component Extension Set. In this document, the following short forms are used:

- “SAP ECC” for “SAP ERP Central Component”
- “SAP ECC Core” for “SAP ERP Central Component Core”
- “SAP ECC Extension Set” for “SAP ERP Central Component Extension Set”

End of: Enhancement Package Installation;Installation;Upgrade |

Only valid for: Enhancement Package Installation;Installation;Upgrade |

### SAP NetWeaver Application Server, SAP Web Application Server, and SAP Basis

SAP NetWeaver 7.0 renames SAP Web Application Server as SAP NetWeaver Application Server. In releases before 6.10, the component was called SAP Basis. In this document, the terms are used as follows:

- The term “SAP NetWeaver Application Server” (or the short form “SAP NetWeaver AS”) is used when referring to Release 7.0 and higher.
- The term “SAP Web Application Server” (or the short form “SAP Web AS”) is used when referring to releases between 6.10 and 6.40.

End of: Enhancement Package Installation;Installation;Upgrade |

Only valid for: Enhancement Package Installation;Installation;Upgrade |

### Usage of Release Names

Unless otherwise specified, the term “release” is used in this document to refer to the release of the SAP ECC system or SAP ERP system. The titles of product-specific sections start with the name of the product, for example, “SAP ECC: Backing Up UI Conversion Classes in ESS”.

The following table explains which release of SAP Basis, SAP Web Application Server, and SAP NetWeaver Application Server corresponds to which release of SAP R/3, SAP ECC and SAP ERP:

Table 4

SAP Basis / SAP Web Application Server / SAP NetWeaver Application Server	SAP ERP
SAP Web Application Server 6.40	SAP ERP 5.0
SAP NetWeaver Application Server 7.0	SAP ERP 6.0
SAP NetWeaver Application Server 7.0 including enhancement package 1	SAP ECC 6.04
SAP NetWeaver Application Server 7.0 including enhancement package 2	SAP ERP 6.05
SAP NetWeaver Application Server 7.0 including enhancement package 3	SAP ERP 6.06
SAP NetWeaver Application Server 7.40	SAP ERP 6.17
SAP NetWeaver Application Server 7.50	SAP ERP 6.18

End of: Enhancement Package Installation;Installation;Upgrade |

End of: Enhancement Package Installation;Installation;Upgrade |

## 2 Planning

Only valid for: Enhancement Package Installation;Upgrade |

This section of the guide contains important information that you need to read before starting your update or upgrade process.

End of: Enhancement Package Installation;Upgrade |

### 2.1 Supported Source Releases

This section provides an overview of the supported upgrade and update paths to SAP enhancement package 8 for SAP ERP 6.0.

Before the update or upgrade, your SAP system must have one of the source releases that have been released for this update and that apply to all databases.

#### Caution

If you have to apply Support Packages to your source release shortly before the upgrade or update, check whether the equivalent Support Package for the target release is already available. Otherwise this may delay your upgrade schedule.

Table 5

Source Releases	Target Release	Upgrade Type
SAP ERP 6.0	SAP ERP 6.0 including SAP enhancement package 8 (based on SAP NetWeaver 7.5)	Enhancement package installation
SAP ERP 6.0 including SAP enhancement package 2 – 7	SAP ERP 6.0 including SAP enhancement package 8 (based on SAP NetWeaver 7.5)	Enhancement package update

Only valid for: Enhancement Package Installation;Upgrade |

#### Note

If your source system is on ERP 6.0, see SAP Note [2187353](#) for the minimum SP equivalence of SAP NetWeaver.

End of: Enhancement Package Installation;Upgrade |

Table 6

Only valid for: Enhancement Package Installation;Upgrade |

## 2.2 Dual-Stack Split

Dual-stack systems are no longer supported for the upgrade target SAP enhancement package 8 for SAP ERP 6.0. For more information, see SAP Note [1818619](#).

If your SAP ERP system is currently implemented as a dual-stack system, you need to perform a split on your source system before starting the upgrade.

End of: Enhancement Package Installation;Upgrade |

Only valid for: Enhancement Package Installation;Upgrade |

## 2.3 Upgrade for Unicode source releases only

SAP ERP EHP8 is based on SAP Netweaver 7.5, which supports Unicode only.

Upgrades of non-Unicode systems to releases, which are based on a SAP Netweaver release higher than SAP NetWeaver 7.40 without prior Unicode conversion are not supported.

### Caution

Usage of Maintenance Planner is mandatory.

## More Information

SAP Note [2033243](#)

End of: Enhancement Package Installation;Upgrade |

Only valid for: Enhancement Package Installation;Upgrade |

## 2.4 Using the Application-Specific Upgrade Toolbox

Only valid for: Upgrade |

### Note

This only applies to the ABAP part of the upgrade.

End of: Upgrade |

The application-specific upgrade toolbox (ASU Toolbox) allows you to manage the preparation and follow-up activities you need to perform for the technical upgrade.

It consists of the following two parts:

- Application-specific content (ASU content definition) in the form of an XML file

The XML file contains a list of manual and automatic steps. It is included in the upgrade export and updated with the correction package for the upgrade program.

- Interface that interprets the XML file and presents the steps to the user for processing  
Before the upgrade, this interface displays the preparation activities. After the upgrade, it displays the follow-up activities.  
You can use the interface to enhance the XML file with your own activities and comments.

## Prerequisites

- Your source release SAP system contains the add-on `ST-PI 2008_1_<x>` (where `<x>` stands for one of the following: 46C, 620, 640, 700 or 710).
- You require authorization for the following transactions:
  - `/ASU/START`
  - `/ASU/UPGRADE`
  - `/ASU/SSM`
- You have the authorizations that you require for the individual activities in the ASU Toolbox step list.

### ➔ Recommendation

Operate the ASU Toolbox with a user with `SAP_ALL` authorizations.

## Procedure

In the roadmap step [Checks](#), the upgrade program prompts you to call transaction `/ASU/UPGRADE`.

For more information, see SAP Note [1000009](#).

### 1 Note

You can perform the follow-up activities listed in the ASU Toolbox in parallel to adjusting repository objects using transaction SPAU.

End of: Enhancement Package Installation;Upgrade |

Only valid for: Enhancement Package Installation;Upgrade |

## 2.5 ABAP Load

The ABAP load provided via upgrade export media will be needed for all supported source releases and containing all software components for the target release SAP ERP EHP8. Therefore the calculated stack will not containing delta packages from lower enhancement packages anymore.

End of: Enhancement Package Installation;Upgrade |

## 3 Preparation

This section of the guide contains important information about preparatory tasks that you need to complete before starting your update or upgrade process.

### 3.1 Free Space Requirements

Make sure that the system that you want to update (upgrade) has at least the following amount of free space:

#### Database-Independent

Table 7

Software Update Manager (SUM) Directory	Approximately 50 GB
Download Directory (temporary space requirement)	Approximately 10 GB
DIR_TRANS	Approximately 10 GB
Shadow System	Approximately the space required for your source release instance, that is, the size of the following directories: <ul style="list-style-type: none"> <li>• UNIX: <code>usr/sap/&lt;sapsid&gt;</code></li> <li>• Windows: <code>&lt;drive&gt;\usr\sap\&lt;sapsid&gt;</code></li> <li>• IBM i: <code>usr/sap/&lt;SID&gt;</code></li> </ul>

#### Database-Dependent

Table 8

Free space in the database	Approximately 50 GB  <b>IBM DB2 for i</b> only: The database of a system without customer data needs approximately 80 GB of disk space. However, during the upgrade, you might temporarily need up to 120 GB.
----------------------------	---

### 3.2 SAP ECC: Customize RFC Destination

If you are using the `FINBASIS` software component and want to avoid errors in phase `XPRAS_AIMMRG` of the update, you have to customize a special RFC destination with a DDIC user. A DDIC user is required for this RFC

destination since only DDIC users are not locked during the upgrade/update. For more information, see SAP Note [912369](#).

End of: Enhancement Package Installation;Upgrade |

Only valid for: Enhancement Package Installation;Upgrade |

### 3.3 SAP ECC: Backing Up Wage Types in HR (T512W) (HR Customers)

Only valid for: Upgrade |

We recommend that you back up the wage type table T512W before the upgrade. You must back up this table in the following cases:

End of: Upgrade |

Only valid for: Enhancement Package Installation |

We recommend that you back up the wage type table T512W before installing the enhancement package. You must back up this table in the following cases:

End of: Enhancement Package Installation |

- You have modified technical wage types, meaning wage types beginning with “/” (adjustment of processing class, evaluation class, and so on).
- You are using SAP model wage types, meaning wage types beginning with a letter, and have modified these wage types.
- You have defined wage types that are not within the customer name range. To check whether this applies, in table TRESC enter **T512W** as the table name and **TABU** as the object.

#### Prerequisites

You use the SAP component Human Resources (SAP HR).

#### Procedure

1. Only valid for: Upgrade |

Before the upgrade, back up table T512W or selected areas of this table.

End of: Upgrade |

Only valid for: Enhancement Package Installation |

Before installing the enhancement package, back up table T512W or selected areas of this table.

End of: Enhancement Package Installation |

Use report RPU12W0S for this. The documentation on the report includes instructions on how to proceed.

#### **1** Note

Table T512W is client-specific. Make sure that you back up the data in all the SAP HR clients in the system.

2. Document exactly which wage types you have modified.

3. Only valid for: Upgrade |  
After the upgrade you can restore your backup copy.  
End of: Upgrade |

Only valid for: Enhancement Package Installation |  
After installing the enhancement package you can restore your backup copy.  
End of: Enhancement Package Installation |

You can use report RPU12W0C for this. It reloads selected parts of table T512W. This method is particularly suitable if you have exact documentation on the wage types you have modified.

#### Note

If you are not sure whether you have to reload the table data, contact your HR application consultant.

Only valid for: Upgrade |  
For more information about upgrading the SAP application component SAP HR, see SAP Service Marketplace at [service.sap.com/hrupgrade](https://service.sap.com/hrupgrade).  
End of: Upgrade |  
End of: Enhancement Package Installation;Upgrade |  
Only valid for: Enhancement Package Installation;Upgrade |

## 3.4 SAP ECC: Integration of SAP E-Recruiting

You can run SAP E-Recruiting in the same system as SAP ERP Central Component (SAP ECC) or in a different system in a standalone scenario.

### Procedure

1. Follow the instructions described in SAP Note [997181](#).
2. If you encounter problems relating to the implementation HRRCF00\_DELETE\_SPREL of the Business Add-In (BAI) HRALE00\_INBOUND\_IDOC, change the activation status of the BAI implementation to inactive. For more information, see SAP Note [1081660](#).

End of: Enhancement Package Installation;Upgrade |  
End of: Enhancement Package Installation;Upgrade |

## 4 Process

This section of the guide contains information about process-related application-specific tasks (in some cases, there are no application-specific tasks).

### 4.1 Note About the Process

The following table contains definitions of the terms “update” and “upgrade”:

Table 9

Term	Definition
<i>Update</i>	Installation of an enhancement package in an existing SAP system.
<i>Upgrade</i>	Upgrade to an SAP system including an enhancement package.

The update and upgrade processes are described in detail in the Software Update Manager (SUM) guide. The latest SUM 1.0 SP level can be found in the latest version of the SL Toolset 1.0 SPS level. See SAP Note [1563579](#)  for a information on the latest SL Toolset 1.0 SPS level.

The SUM guide contains information on the overall process, tools, the operating system, and the database, while this guide contains the application-specific information.

SAP ERP 6.0 enhancement package 8 requires application-specific steps for SAP HANA in the *Process* section. All generic steps are documented in the SUM guides.

For the SUM guides, see SAP Help Portal at ► [help.sap.com/sltoolset](https://help.sap.com/sltoolset)  ► *System Maintenance* ► *Software Update Manager (SUM)* .

### 4.2 SAP HANA: Update and Migration Process

This section of the guide provides an overview of the update and upgrade process steps required to enable SAP enhancement package 8 for SAP ERP 6.0 to run on SAP HANA, as well as the steps required to update a system already running on SAP HANA to SAP enhancement package 8 for SAP ERP 6.0.

#### Note

Updates from a system running on SAP HANA to SAP enhancement package 8 for SAP ERP 6.0 are possible only as of SAP HANA SP 10 or higher.

## Process

The update process consists of the steps listed below, some of which may be optional, depending on your start release.

### 1. System Copy

Before performing the steps described below, consider making a homogeneous system copy to preserve your current status so that you have a reference or fallback system in place. You can make the system copy before performing any of the steps below, depending on your requirements and scheduling.

- For more information about copying systems based on SAP NetWeaver 7.1 (or higher), see the documentation at ► [help.sap.com/slttoolset](https://help.sap.com/slttoolset) ► *System Provisioning* ► *Software Provisioning Manager* ►.

### 2. Migration of an SAP ERP System to Run on SAP HANA

#### 1. Installation of SAP HANA

The SAP HANA appliance software can only be installed by certified hardware partners on validated hardware running a specific operating system.

For more information, see the following:

- [help.sap.com/hana](https://help.sap.com/hana) ► *SAP HANA Appliance* ► *System Administration and Maintenance Information* ► *SAP HANA Technical Operations Manual (TOM)* ►.
- SAP Note [1514967](#) ►

#### 2. Installation of Application Function Libraries (AFLs)

Install the AFLs as described in the *SAP HANA Update and Configuration Guide* at ► [help.sap.com/hana](https://help.sap.com/hana) ► *SAP HANA* ► *SAP HANA Platform* ► *Installation and Upgrade Information* ►.

#### Note

SAP HANA runs natively on Unicode only. If your system does not yet run on Unicode, consider performing the conversion.

#### Note

##### Database Migration for SAP HANA Database

An existing SAP system is migrated to the SAP HANA database automatically using the *Database Migration Option* (DMO) of the Software Update Manager (SUM), which updates and migrates the database in one step. You need to use at least SPS 15 of the Software Update Manager 1.0. For more information, see the following:

- SAP Note [1875197](#) ►
- SAP Note [2161396](#) ►
- [help.sap.com/slttoolset](https://help.sap.com/slttoolset) ► *Documentation section: System Maintenance* ► *DMO of SUM 1.0 <latest SP level>* ►

End of: Enhancement Package Installation;Upgrade |

End of: Enhancement Package Installation;Installation;Upgrade |

## 5 Follow-Up Activities

This section of the guide describes application-specific steps that have to be performed after the update or upgrade process is complete.

This section of the guide describes application-specific steps that have to be performed after the installation process is complete.

Only valid for: Enhancement Package Installation;Upgrade |

### 5.1 SAP ECC: SAP HR Customers Only: Reloading Table T512W (Wage Types in HR)

#### Procedure

If you have saved table T512W before the upgrade, reload it now. For the exact procedure, see [SAP ECC: Backing Up Wage Types in HR \(T512W\) \(HR Customers\) \[page 15\]](#).

End of: Enhancement Package Installation;Upgrade |

Only valid for: Enhancement Package Installation;Upgrade |

### 5.2 SAP ECC: SAP Retail Customers Only: Converting Short Texts

#### Procedure

You must replace the short texts for some languages. For more information, see the SAP online documentation under ► [Help](#) ► [SAP Library](#) ► [SAP ERP](#) ► [SAP ERP Central Component](#) ► [Logistics](#) ► [SAP Retail](#) ► [Basic Principles](#) ► [Retail Terminology](#) ►.

End of: Enhancement Package Installation;Upgrade |

Only valid for: Enhancement Package Installation;Upgrade |

### 5.3 Upgrade of Financial Accounting (FI-AP-AP-A, FI-AR-AR-A, FI-GL-GL-A)

In SAP enhancement package 6 for SAP ERP 6.00 (SAP\_APPL 606), extensive changes have been made to the standard code. This applies to all of the transactions for the manual entry of documents. From a technical point of view, the following programs are affected: SAPMF05A, SAPMF05B, SAPMF05L, SAPDF05X, SAPLTAX1, SAPLKACB, SAPLFWTC, SAPLFWTD, SAPLFWTH, SAPLFWTI, SAPLFWTT, SAPLFWTU, SAPLFWTZ,

---

SAPFX001, SAPF110E, SAPFF001, SAPFF002, SAPFF004, SAPFF011, SAPFF012, SAPFF014, SAPFS003, and SAPFS006.

## Procedure

If you have **not modified** the programs concerned prior to SAP enhancement package 6 for SAP ERP 6.0 (SAP\_APPL 606), you do not need to take any further action.

If you have **modified** the programs concerned prior to SAP enhancement package 6 for SAP ERP 6.0 (SAP\_APPL 606), then you must use transaction SPAU to perform a modification adjustment so that following an upgrade you can continue to use the programs as before. For more information about the changes you have to make in the code, see SAP Note [1605816](#) .

End of: Enhancement Package Installation;Upgrade |

# A Reference

## A.1 The Main SAP Documentation Types

The following is an overview of the **most important** documentation types that you need in the various phases in the life cycle of SAP software.

### Cross-Phase Documentation

**SAPterm** is SAP's terminology database. It contains SAP-specific vocabulary in over 30 languages, as well as many glossary entries in English and German.

- Target group:
  - Relevant for all target groups
- Current version:
  - On SAP Help Portal at [help.sap.com](https://help.sap.com) ➔ [Glossary](#) ➤
  - In the SAP system in transaction `STERM`

**SAP Library** is a collection of documentation for SAP software covering functions and processes.

- Target group:
  - Consultants
  - System administrators
  - Project teams for implementations or upgrades
- Current version:
  - On SAP Help Portal at [help.sap.com](https://help.sap.com) ➔ (also available as documentation DVD)

The **security guide** describes the settings for a medium security level and offers suggestions for raising security levels. A collective security guide is available for SAP NetWeaver. This document contains general guidelines and suggestions. SAP applications have a security guide of their own.

- Target group:
  - System administrators
  - Technology consultants
  - Solution consultants
- Current version:
  - On SAP Service Marketplace at [service.sap.com/securityguide](https://service.sap.com/securityguide) ➔

### Implementation

The **master guide** is the starting point for implementing an SAP solution. It lists the required installable units for each business or IT scenario. It provides scenario-specific descriptions of preparation, execution, and follow-up of an implementation. It also provides references to other documents, such as installation guides, the technical infrastructure guide and SAP Notes.

- Target group:
  - Technology consultants

- Project teams for implementations
- Current version:
  - On SAP Service Marketplace at [service.sap.com/instguides](https://service.sap.com/instguides) ➤

The **installation guide** describes the technical implementation of an installable unit, taking into account the combinations of operating systems and databases. It does not describe any business-related configuration.

- Target group:
  - Technology consultants
  - Project teams for implementations
- Current version:
  - On SAP Service Marketplace at [service.sap.com/instguides](https://service.sap.com/instguides) ➤

**Configuration Documentation in SAP Solution Manager** – SAP Solution Manager is a life-cycle platform. One of its main functions is the configuration of business scenarios, business processes, and implementable steps. It contains Customizing activities, transactions, and so on, as well as documentation.

- Target group:
  - Technology consultants
  - Solution consultants
  - Project teams for implementations
- Current version:
  - In SAP Solution Manager

The **Implementation Guide (IMG)** is a tool for configuring (Customizing) a single SAP system. The Customizing activities and their documentation are structured from a functional perspective. (In order to configure a whole system landscape from a process-oriented perspective, SAP Solution Manager, which refers to the relevant Customizing activities in the individual SAP systems, is used.)

- Target group:
  - Solution consultants
  - Project teams for implementations or upgrades
- Current version:
  - In the SAP menu of the SAP system under ► [Tools](#) ► [Customizing](#) ► [IMG](#) ►

## Production Operation

The **technical operations manual** is the starting point for operating a system that runs on SAP NetWeaver, and precedes the application operations guides of SAP Business Suite. The manual refers users to the tools and documentation that are needed to carry out various tasks, such as monitoring, backup/restore, master data maintenance, transports, and tests.

- Target group:
  - System administrators
- Current version:
  - On SAP Service Marketplace at [service.sap.com/instguides](https://service.sap.com/instguides) ➤

The **application operations guide** is used for operating an SAP application once all tasks in the technical operations manual have been completed. It refers users to the tools and documentation that are needed to carry out the various operations-related tasks.

- Target group:
  - System administrators

- Technology consultants
- Solution consultants
- Current version:
  - On SAP Service Marketplace at [service.sap.com/instguides](https://service.sap.com/instguides) ➤

## Upgrade

The **upgrade master guide** is the starting point for upgrading the business scenarios and processes of an SAP solution. It provides scenario-specific descriptions of preparation, execution, and follow-up of an upgrade. It also refers to other documents, such as upgrade guides and SAP Notes.

- Target group:
  - Technology consultants
  - Project teams for upgrades
- Current version:
  - On SAP Service Marketplace at [service.sap.com/instguides](https://service.sap.com/instguides) ➤

The **upgrade guide** describes the technical upgrade of an installable unit, taking into account the combinations of operating systems and databases. It does not describe any business-related configuration.

- Target group:
  - Technology consultants
  - Project teams for upgrades
- Current version:
  - On SAP Service Marketplace at [service.sap.com/instguides](https://service.sap.com/instguides) ➤

**Release notes** are documents that contain short descriptions of new features in a particular release or changes to existing features since the previous release. Release notes about ABAP developments are the technical prerequisite for generating delta and upgrade Customizing in the Implementation Guide (IMG).

- Target group:
  - Consultants
  - Project teams for upgrades
- Current version:
  - On SAP Service Marketplace at [service.sap.com/releasenotes](https://service.sap.com/releasenotes) ➤
  - In the SAP menu of the SAP system under ► **Help** ► **Release Notes** ► (only ABAP developments)

# Typographic Conventions

Table 10

Example	Description
<Example>	Angle brackets indicate that you replace these words or characters with appropriate entries to make entries in the system, for example, "Enter your <User Name>".
► Example ► Example ▢	Arrows separating the parts of a navigation path, for example, menu options
<b>Example</b>	Emphasized words or expressions
<b>Example</b>	Words or characters that you enter in the system exactly as they appear in the documentation
<a href="http://www.sap.com">www.sap.com</a> 	Textual cross-references to an internet address
<a href="#">/example</a>	Quicklinks added to the internet address of a homepage to enable quick access to specific content on the Web
<a href="#">123456</a> 	Hyperlink to an SAP Note, for example, SAP Note <a href="#">123456</a> 
<i>Example</i>	<ul style="list-style-type: none"> <li>Words or characters quoted from the screen. These include field labels, screen titles, pushbutton labels, menu names, and menu options.</li> <li>Cross-references to other documentation or published works</li> </ul>
Example	<ul style="list-style-type: none"> <li>Output on the screen following a user action, for example, messages</li> <li>Source code or syntax quoted directly from a program</li> <li>File and directory names and their paths, names of variables and parameters, and names of installation, upgrade, and database tools</li> </ul>
EXAMPLE	Technical names of system objects. These include report names, program names, transaction codes, database table names, and key concepts of a programming language when they are surrounded by body text, for example, SELECT and INCLUDE
<span>EXAMPLE</span>	Keys on the keyboard
